

The Computer Journal

Instructions to Authors

Please read and follow these instructions carefully, doing so will ensure that the review and publication of your paper is as rapid and efficient as possible. The Editors reserve the right to return manuscripts that are not prepared in accordance with these instructions.

Submission of manuscripts

Authors should submit postscript, PDF or Word files by via <http://compj.manuscriptcentral.com>. Please contact the Editorial Office on compj@hq.bcs.org.uk for additional help with manuscript submission. Work submitted for publication must be previously unpublished, not under consideration for publication elsewhere and, if accepted, it should not then be published elsewhere in the same form. If previously published figures, tables or parts of text are to be included, the copyright-holder's permission must have been obtained prior to submission. Authors should supply a list of between three and five referees who would be suitable to referee the paper. Please enclose full name, email and full postal addresses.

Copyright

It is a condition of publication in the Journal that authors grant an exclusive licence to the British Computer Society. This ensures that requests from third parties to reproduce articles are handled efficiently and consistently and will also allow the article to be as widely disseminated as possible. In assigning copyright, authors may use their own material in other publications, provided that the Journal is acknowledged as the original place of publication, and Oxford University Press is notified in writing and in advance.

Conflict of interest

At the point of submission, *The Computer Journal's* policy requires that each author reveal any financial interests or connections, direct or indirect, or other situations that might raise the question of bias in the work reported or the conclusions, implications, or opinions stated—including pertinent commercial or other sources of funding for the individual author(s) or for the associated department(s) or organization(s), personal relationships, or direct academic competition. When considering whether you should declare a conflicting interest or connection please consider the conflict of interest test: is there any arrangement that would embarrass you or any of your co-authors if it was to emerge after publication and you had not declared it?

As an integral part of the online submission process, corresponding authors are required to confirm whether they or their co-authors have any conflicts of interest to declare, and to provide details of these. If the corresponding author is unable to confirm this information on behalf of all co-authors, the authors in question will then be required to submit a completed Conflict of Interest form to the Editorial Office (please see website for link to the form). It is the corresponding author's responsibility to ensure that all authors adhere to this policy.

If the manuscript is published, Conflict of Interest information will be communicated in a statement in the published paper.

Funding

Details of all funding sources for the work in question should be given in a separate section entitled 'Funding'. This should appear before the 'Acknowledgements' section. The following rules should be followed: the full official funding agency name should be given, i.e. 'National Institutes of Health', not 'NIH'; grant numbers should be given in brackets; multiple grant numbers should be separated by a comma; agencies should be separated by a semi-colon; no extra wording like 'Funding for this work was provided by ...' should be used; where individuals need to be specified for certain sources of funding the following text should be added after the relevant agency or grant number 'to [author initials]'. An example is given here: 'National Institutes of Health (CB5453961 to C.S., DB645473 to M.H.); Funding Agency (hfygr667789).'

Preparation of the manuscript

General

Papers must be clearly written in English. If authors choose to send hard copies, an original plus three copies of the manuscript and figures should be submitted. The text should be presented on A4 or an equivalent size paper. Margins of at least 25 mm should be left around all sides of the text. Please number each page but provide a short running title on the title page only. Ensure that any unusual or handwritten symbols or letters are clearly identifiable. The manuscript should contain the following information: the full and a short title, and a complete list of authors, their affiliations and addresses; the main text; all figures and tables, and references. The corresponding author should be identified along with both his/her postal and e-mail addresses, and telephone and fax numbers.

References

The accuracy of the references is the author's responsibility. Only published articles or reports readily accessible in the general literature should be cited.

The references should appear in the text in numerical order, as should the reference list. Where there are more than 10 contributing authors please list only the first author and use *et al.* The following format for references should be followed:

Journal article:

Galton, A. (1992) Logic as a formal method. *Comp. J.*, **35**, 431–440.

Book:

Hogger, C. (1990) *Essentials of Logic Programming*. Clarendon Press, Oxford.

Chapter:

Harel, D. (1984) Dynamic logic. In Gabbay, D. and Guenther, F. (eds), *Handbook of Philosophical Logic*. D. Reidel, Dordrecht.

Conference:

Crochemore, M. and Verin, R. (1997) Direct construction of compact directed acyclic word graphs. *Proceedings of CPM 97*, Cambridge, MA, 12–14 August, pp. 192–211. Springer-Verlag, Berlin.

Technical documents:

ITU-T. Z.500 (1997) *Framework on formal methods in conformance testing*. International Telecommunications Union, Geneva, Switzerland.

Advance Access papers:

Rae, A. and Fidge, C. Information flow analysis for fail-secure devices. Advance Access published December 15, 2004, 10.1093/comjnl/bxh056 The same paper in its final form would be cited: Rae, A. and Fidge, C. Information flow analysis for fail-secure devices. *Comp. J.*, **48**, 21–56. First published December 15, 2004: 10.1093/comjnl/bxh056. Tables should be clear and self-explanatory. Vertical rules will not be used in the published version. Any footnotes required should be indicated using superscripted letters. Footnotes to the main text are acceptable and should be identified by superscripted numbers. Footnotes should also appear on the page of citation. Figures can be presented within the text of the paper, however, all figures should be supplied in an electronic format (postscript, EPS and TIFF preferred). If authors cannot supply an electronic version of the figures, high-quality laser print-outs should be provided. Figures should be formatted to fit into, or be reduced to, a single (85 mm) or double (178 mm) column width. Please also supply a legend for each figure. Halftones should be of sufficient quality with respect to detail, contrast and fineness of grain to withstand the unavoidable loss of contrast inherent in the printing process. Colour figures are acceptable for publication. However, due to the high costs involved, authors will be invoiced after publication for the full cost incurred. Authors should contact the publisher for details prior to submission.

Submission of final version to the Production Office

L^AT_EX 2 ϵ

Authors wishing to submit T_EX-based manuscripts are encouraged. Manuscripts should be produced using the specially produced journal class file, which has been constructed using L^AT_EX 2 ϵ . The class file is available from the Production Editor or the Editorial Office. PostScript files cannot be accepted as some editorial changes may be required following acceptance.

Word-processed documents

In addition to the hard copies of the manuscript and figures, authors should provide a copy on disk which may be used for typesetting. Most Macintosh or PC-based word processing packages are acceptable for translation and publication in *The Computer Journal*. All manuscripts will undergo some editorial modification so it is important to check proofs carefully. Please try to follow the guidelines listed below, they are designed to reduce production delays and minimise editorial changes and thus the possible introduction of errors.

- Save the text as a single word processor file.
- Please also provide EPS or TIFF versions of any figures.
- Please cite and list references in journal style (see above).
- Complex displayed equations will still be manually typeset, therefore please check the proofs carefully.
- Use carriage returns to end headings and paragraphs only, not to introduce space between paragraphs and headings.
- Remove automatic justification, page numbering, footnotes, hyphenation, and running heads.

Proofs and offprints

One round of page proofs will be sent to the corresponding author for checking. To avoid delays in publication, proofs should be checked and returned immediately by email, fax or post to the Production Editor, Oxford Journals, Oxford University Press, Great Clarendon Street, Oxford OX2 6DP. Email: comjnl@oxfordjournals.org. Fax: 01865 355760. Extensive changes to the text of the paper may be charged to the author. The publisher will provide each author with free online access to their paper. Extra offprints, or single issues of the journal, may be ordered when the corrected proofs are returned using the form provided.
