## Announcement

21-24 SEPTEMBER 1992

**BMVC 92, British Machine Vision Conference, University of Leeds**

The British Machine Vision Conference is the main UK conference for machine vision and related topics. The emphasis is on UK research being undertaken through national or international collaborative projects, providing a forum for the presentation and discussion of the latest results of investigations.

A printed copy of the *Proceedings* will be

available to delegates at the conference, and a selection of the best papers will be published separately in a special issue of *Image and Vision Computing Journal*.

Topics will include:

- image processing and feature extraction
- object recognition and scene analysis
- reconstruction of 3D shape
- advanced pattern analysis
- computational issues in perception
- robotic vision and sensor fusion
- practical applications

- model-based coding
- architectures
- active vision
- motion analysis
- neural networks

*For further information contact:*

Professor David Hogg, School of Computer Studies, University of Leeds, Leeds LS2 9JT.
